

Due Wednesday, 23 Feb 2022, by 11:59pm to Gradescope.
100 points total.

You should complete the notebooks in order, i.e., CNN-Layers, followed by CNN-BatchNorm, followed by CNN. This is due to potential dependencies. Note however, that CNN can be completed without CNN-Layers, since we provide the fast implementation of the CNN layers to be used in question 3.

1. (40 points) **Implement convolutional neural network layers.** Complete the CNN-Layers.ipynb Jupyter notebook. Print out the entire workbook and relevant code and submit it as a pdf to gradescope. Download the CIFAR-10 dataset, as you did in earlier homework.
2. (20 points) **Implement spatial normalization for CNNs.** Complete the CNN-BatchNorm.ipynb Jupyter notebook. Print out the entire workbook and relevant code and submit it as a pdf to gradescope.
3. (40 points) **Optimize your CNN for CIFAR-10.** Complete the CNN.ipynb Jupyter notebook. Print out the entire workbook and relevant code and submit it as a pdf to gradescope.
